

# YD-100 LOW RANGE SALINOMETER

Pen – type salinometer is a portable pen – type precision instrument designed for field operation and field operation. The instrument is suitable for water source monitoring, aquaculture, environmental protection, printing and dyeing, electroplating, beverage industry and scientific research institutions to determine water quality salinity.

Main technical performance of the instrument

model	YD – 100
Measuring range	100 g/L
resolution	0.1 g/L.
precision	+ / – 0.2 g/L
Temperature display	0.1 °C / °F
Working temperature	0 ~ 50 °C (32 ~ 122 °F)
Automatic temperature compensation	0 ~ 50 °C
size	Φ 40 * 185 mm including electrode.
weight	88 g (including electrode).
