## **DO ELECTRODE**

## Main technical indexes

1. Measurement range:

Dissolved oxygen :  $(0.0 \sim 20.0)$ mg/L

Temperature  $(0 \sim 40 \,^{\circ} \,^{\circ} \,^{\circ} \,^{\circ})$ 

2. Basic error:

Dissolved oxygen: plus or minus 0.3mg/L

Temperature: + 1 ° C for

3. Residual current: not greater than 0.15mg/L

4. Response time: not more than 30 s (20 ° C at 90% response)

5. Automatic temperature compensation scope:  $(0 \sim 40 \,^{\circ} \,^{\circ} \,^{\circ})$
