

PHS-3CW MICROCOMPUTER DIGITAL DISPLAY PH METER

This instrument is an intelligent pH meter controlled by microprocessor. It is made of high reliable imported integrated components and refined by strict screening. Its performance is stable, reliable and easy to operate. It is suitable for precise measurement of the acidity (pH) and electrode potential (mV) of the solution in the laboratory. It is widely used in the electrochemical analysis of light industry, chemical industry, pharmacy, food, epidemic prevention, environmental protection and education scientific research department.

model

PHS - 3 e

PHS - 3 the cw

PHS - 3 dw

Measuring range

PH: -2 ~ 18.00pH

MV: + 1999 mV,

Temperature: 0 ~ 100 °C

PH: 0 ~ 14.00

MV: + 1999 mV,

Temperature: 0 ~ 100 °C

PH: 0 ~ 14.00

MV: + 1999 mV,

Temperature: 0 ~ 100 °C

The resolution of the

PH: 0.01/0.1 pH,

Temperature: + / - 1 °C

PH: 0.01/0.1 pH,

Temperature: + / - 1 °C

PH: 0.01/0.1 pH,

Temperature: + / - 1 °C

precision

PH: 0.01 pH, temperature, plus or minus 1 °C

PH: 0.01 pH, temperature, plus or minus 1 °C

PH: 0.01 pH, temperature, plus or minus 1 °C

Temperature compensation

0-100 °C manual/automatic compensation

0-100 °C manual compensation

With 018 temperature electrode, automatic temperature compensation can be achieved

0-100 °C manual/automatic compensation

Storage record

It has data storage function
