TM-1 TRANSPARENCY TESTER

●**Transparency tester is requisite for detecting transparency of gelation.**

Applicable standards:

●National standard (Food additive Gelatin)

●National standard (Hard gelatin capsule for medicine)

●Vocation standard (Gelatin for medicine)

●Corporate standard (Thickness tester)

Features:

●Thoroughly eliminating the influence to results by environment and
  experimenter's visual error.

●Standard test tube and same capacity of sample.

●High stable light source system, equal brightness.

●High precise photoelectric transducers for testing exactly.

●Auto-testing, transparency being conversion accounted automatically.

●Automation: auto-test, auto-diagnose, auto-alarm.

Specifications:

●Test range   (20～500) mm

●Test accuracy   ± 5 mm

●Volume   400ml

●Power   220V/ 50Hz/ 80W●Dimension (360×240×120) mm³
